HPE 3PAR STORESERV 20000 4-WAY STORAGE CONFIGURATION BASE (C8S89B)

3PAR StoreServ Storage

WHAT'S NEW

- Empower data at the speed of memory with the industry's first Tier-1 storage with Storage Class Memory (SCM) and NVMe
- Reduce troubleshooting and management headaches with HPE InfoSight Advanced Performance Analytics, available in HPE SSMC 3.4 management console
- Eliminate storage networking bottlenecks

OVERVIEW

Have Cloud or IT-as-a-Service (ITaaS) environments forced you to settle for Tier-1 storage that compromises your data center? HPE 3PAR StoreServ 20000 Storage is an enterprise flash array with more than 3.8M IOPS, sub-millisecond latencies, a 16x density advantage over the competition [1], and scalability of over 20 PB of usable capacity for massive consolidation – for block and file workloads as well as object access – with Quality of Service (QoS). The flash-optimized

and accelerate performance for all-flash
with new HPE 3PAR 32Gb FC

architecture features the HPE 3PAR Gen5 ASIC for silicon-based hardware acceleration, including inline deduplication, compression, data packing, thin technologies and other compaction technologies that can reduce acquisition and operational costs without compromising performance. Configuration options are available for all-flash models and combined flash and HDD models. HPE 3PAR StoreServ 20000 also includes at no extra charge data protection with HPE Recovery Manager Central.

FEATURES

Accelerate Fiber Channel Performance for 3PAR all Flash storage

HPE 3PAR 9000/20000 32Gb FC HBA delivers up to 2X performance compared to the 16Gb 4 port FC HBA in a smaller port footprint for mixed workloads and FC port consolidation.

Resilient So You Can Consolidate with Confidence

The HPE 3PAR StoreServ 20000 Storage maintains 99.9999% availability with a complete set of persistent technologies within your Hewlett Packard Enterprise 3PAR array.

Consolidate with confidence and protect against interference from multiple partitions “noisy” neighbors by delivering consistent Quality of Service (QoS).

Achieve extreme data protection for a complete enterprise disaster recovery plan by extending peer persistence support for a third data center across geographical distances.

Simplify backup and restore with HPE Recovery Manager Central (RMC) for application-aware, storage-integrated data protection.

Futureproof to Support Hybrid and On-demand Computing

Get ready for what’s next with the HPE 3PAR StoreServ 20000 Storage emerging technologies, such as storage class memory (SCM) and Non-Volatile Memory Express (NVMe) to protect your investments.

Get All-Flash on premise for a low cost per GB per month, with HPE Flash Now Program.

Modernize your EMC®, HDS®, and IBM® storage infrastructure with painless, no-cost data migration. HPE 3PAR Online Import seamlessly moves data between any HPE 3PAR StoreServ array.

Automated SAN configuration with built-in target driven federated zoning, with HPE Smart SAN.

Flexible to Meet Unpredictable Business Demands

The HPE 3PAR StoreServ 20000 Storage supports the most rigorous, on-demand infrastructure with a virtually limitless, elastic pool of storage.

Runs workloads at the right cost and service level agreement (SLA) with one-click workload balancing.

Slashes management overhead with unified management of block, file, and object access and storage that is self-configuring, self-provisioning, and self-optimizing.

Technical specifications

HPE 3PAR StoreServ 20000 4-way Storage Configuration Base

Product Number (SKU)	C8S89B
Capacity	6 PB Raw 15 PB Useable Based on 3.84 TB cLMC SSDs and HPE 3PAR compaction technologies
Drive description	(1920) SFF SAS/MDL SAS/SSD or (1024) SFF/LFF SSD or (960) LFF MDL SAS
Enclosures	(96) 3PAR 12 Gb/sec SAS SFF Drive Enclosure (96) 3PAR 12 Gb/sec SAS LFF Drive Enclosure
Maximum drives per enclosure	24
Host interface	32 Gb/sec Fibre Channel (10) Ports per controller
Cache	51.6 TiB Maximum, depending on model
Storage controller	(8) 3PAR 6-core 2.5 GHz 20800 Controller Node (8) 3PAR 8-core 2.5 GHz 20850 Controller Node (4) 3PAR 8-core 2.5 GHz 20450 Controller Node (8) 3PAR 8-core 2.5 GHz 20840 Controller Node Maximum, depending on model
Availability features	Redundant power supplies, battery backup units, Mesh active controllers Persistent Cache, Drive sparing and Multiple OS instances.
Servers supported	Maximum, depending on model
Compatible operating systems	HP-UX HPE OpenVMS IBM AIX Microsoft Windows Hyper-V Microsoft Windows Server 2012 R2 Citrix XenServer Oracle Linux Oracle Enterprise Linux Oracle UEK Oracle Solaris Ubuntu Server Edition 12.04 LTS Red Hat Enterprise Linux (RHEL) VMware ESX and ESXi SLES11 SP3 Apple OS X Also includes Red Hat Virtualization, IBM Virtualization and SLES Virtualization

HPE POINTNEXT SERVICES

HPE Pointnext Services leverages our breadth and depth of technical expertise and innovation to help to accelerate digital transformation. A comprehensive portfolio that includes – Advisory, Professional, and Operational Services is designed to help you evolve and grow today and into the future.

Operational Services

- **HPE Datacenter Care** offers a tailored operational support solution built on core deliverables. It includes hardware and software support, a team of experts to help personalise deliverables and share best practices, as well as optional building blocks to address specific IT and business needs.
- **HPE Proactive Care** is an integrated set of hardware and software support including an enhanced call experience with start to finish case management helping resolve incidents quickly and keeping IT reliable and stable.
- **HPE Foundation Care** helps when there is a hardware or software problem offering several response levels dependent on IT and business requirements.

Advisory Services includes design, strategy, road map, and other services to help enable the digital transformation journey, tuned to IT and business needs. Advisory Services helps customers on their journey to Hybrid IT, Big Data, and the Intelligent Edge.

Professional Services helps integrate the new solution with project management, installation and startup, relocation services, and more. We help mitigate risk to the business so there is no interruption when new technology is being integrated in the existing IT environment.

HPE GREENLAKE

HPE Greenlake is an as-a-service offering that delivers on-demand capacity and planning, combining the agility and economics of public cloud with the security and performance of on-premises IT.

[1] Based on publicly available information of six EMC VMAX 850 systems totaling 24 PB of usable SSD capacity as compared to the HPE 3PAR 20850 with 24 PB usable SSD capacity (using a 4:1 compaction ratio).
